

generating compliance trend data as a baseline measure; (6) uploading on-site review data if no internet connection is available; and (7) printing options for the on-site review manual and completed reviews. The advantages of automating the Annual On-site Review Manual and process will increase productivity, increase communication on status of on-site reviews, increase efficient use of the Annual On-site Review Manual, and improve implementation of corrective action plans. In FY 2022, the OUIHP continues to develop the electronic Annual On-site Review Manual and process including seeking OMB approval.

The standardization of the Annual On-site Review Manual and process was in line with the 2017–2021 OUIHP strategic plan to improve the consistency, usefulness, and efficiency of annual on-site reviews for IHS Area Offices and UIOs.

The IHCIA at 25 U.S.C. 1655, states that the IHS will annually review and evaluate each UIO funded under the law. The IHCIA also requires IHS to develop procedures for evaluating compliance with awards made under the statute. Section 1655 states, in part:

(a) Contract Compliance and Performance

The Secretary, through the Service, shall develop procedures to evaluate compliance with grant requirements under this subchapter and compliance with, and performance of contracts entered into by [UIOs] under this subchapter. Such procedures shall include provisions for carrying out the requirements of this section.

(b) Annual On-Site Evaluation

The Secretary, through the Service, shall conduct an annual on-site evaluation of each [UIO] which has entered into a contract or received a grant under Section 1653 of this title for purposes of determining the compliance of such organization with, and evaluating the performance of such organization under, such contract or the terms of such grant.

To meet statutory compliance, the IHS will conduct annual on-site reviews of UIOs funded under the IHCIA to ensure grant and contract compliance and the delivery of safe and high-quality health care.

This notice announces our intent to establish a new information collection.

Requests for Comments: Your written comments and/or suggestions are invited on one or more of the following points:

(a) whether the information collection activity is necessary to carry out an agency function;

AGENCY: Coast Guard, DHS.
ACTION: Notice of availability.

SUMMARY: The Coast Guard announces the availability of the Consolidated Port Approaches and International Entry and Departure Transit Areas Port Access Route Studies (CPAPARS). This report

summarizes the findings of four regional port access route studies: the Northern New York Bight; Seacoast of New Jersey Including Offshore Approaches to the Delaware Bay, Delaware; Approaches to the Chesapeake Bay, Virginia; and the Seacoast of North Carolina Including Approaches to the Cape Fear River and Beaufort Inlet, North Carolina. This notice announces the conclusion of the studies supplemental to the Atlantic Coast Port Access Route Study (ACPARS), announced on in the **Federal Register** on March 15, 2019.

FOR FURTHER INFORMATION CONTACT: For information about this document call or email John Stone, Coast Guard; telephone 202–372–1093, email john.m.stone@uscg.mil.

SUPPLEMENTARY INFORMATION:

Background

Atlantic Coast Port Access Route Study

On April 5, 2017, the Coast Guard announced the completion of the Atlantic Coast Port Access Route Study in the **Federal Register** (82 FR 16510), which is available for viewing and

download from the Coast Guard Navigation Center's website at <https://www.navcen.uscg.gov/port-access-route-studies>.

The ACPARS identified navigation safety corridors along the Atlantic Coast based on the predominant two-way vessel traffic and customary routes identified with AIS data for offshore deep draft and coastal seagoing tug/tow vessels. The study recommended developing these corridors into official shipping safety fairways or other appropriate vessel routing measures.

Based on the recommendations provided in the ACPARS, the Coast Guard published an Advance Notice of Proposed Rulemaking (ANPRM) in the **Federal Register** (85 FR 37034) on June 19, 2020. This ANPRM, which is available for viewing and download from the **Federal Register** docket USCG-2019-0279 at www.regulations.gov, sought comments regarding the possible establishment of fairways along the Atlantic Coast of the United States identified in the ACPARS.

Consolidated Port Approaches and International Entry and Departure Transit Areas Port Access Route Studies

Recognizing the ACPARS only analyzed coastal, longshore, and predominantly north/south vessel transit routes along the Atlantic Coast, the Coast Guard announced new studies focused on port approaches and international entry and departure areas along the Atlantic Coast supplemental to the ACPARS, on March 15, 2019. This report summarizes the findings of four regional port access route studies: the Northern New York Bight; Seacoast of New Jersey Including Offshore Approaches to the Delaware Bay, Delaware; Approaches to the Chesapeake Bay, Virginia; and the Seacoast of North Carolina. The CPAPARS has been completed and has been uploaded to the docket and at <https://www.navcen.uscg.gov/port-access-route-study-reports> for public review.

This notice is issued under authority of 46 U.S.C. 70003(c).

Dated: September 2, 2022.
